HOW TO USE

To use the signs, simply drag one of these blueprints into your scene located in:

Content > Digits_Roadsigns-NL > Blueprints >

After you dropped the desired blueprint into your scene you can change the texture with the dropdown menu called 'Sign Number' under the 'Sign' tab. In the same Sign tab, you can also adjust the height of the sign on the pole by using the slider called 'Sign Height'

U can find the codes and description of each sign in the coming pages. The signs and blueprint are divided by the shape of the sign.
